Experience

Web Developer

The First time I become a programmer at PT. Usaha Adi Sanggoro in year 2011. I created website and information system using PHP on the server side and client side using HTML , CSS & Javascript, Sometimes I created mobile apps for BlackBerry Java.

Mobile Developer

Then I joined to PT. Artificia Integra Rekayasa in year 2012, The main jobdesk was mobile developer . I created mobile apps & User Interface Design for some companies such as : PT. PLN (Persero) Pusat Sertifikasi, Magnadana, Charoen Pokphand, and other companies. Some applications implemented on various platform, such as : iOS, Android, BlackBerry 10

and Windows Phone. The Programming Language used is Java, Objective-C, C#, Cascades for BlackBerry 10 and version control system using Git on Bitbucket. In this company I learned Integrated Client Side mobile apps with Serverless REST API and create Design User Interface for mobile apps according to guideline of each platform and fixing the bugs.

Currently i develop apps in iOS dev again since early 2018 and join to startup Nusantara Beta Studio.

Teaching

I Started teach at SMK Adi Sanggoro in 2015. I teach Object Oriented Programming with Java and Mobile Programming for build Android Apps and teach in class XI & XII Software Engineering.

Freelance

In Freelance Time , the last work I created mobile apps KlubPompi (BPOM RI) for Android. KlubPompi is mobile apps for survey food & beverage for student. KlubPompi is native application for android created with Android SDK and available in Google Play Store.

Organization

Recently, I join to Google Developer Group Bogor Community as a Co-Manager. In this community I meet advance developer such as Indonesian Google Developer Expert and some advanced programmers from other large company and I also learn how to manage event IT and connecting with other people in university and schools in Bogor.
